

Combining Broadcast Radio and The Internet

Broadcast

- Mass-market
- Economic coverage
- Free-to-air
- Not interactive
- Personalisation is unrealistic

Internet
Streaming doesn't scale well
(tech/cost)

Perfect for one-to-one
communication

- personalisation
- transactions
- enhancements

Broadcast or Internet

Broadcast and Internet

“Hybrid” Radio

Broadcast works for the mass market
Low Cost, Ubiquitous, Free

The Internet adds “The Back Channel”
Enhanced content, Personalisation and Transactions

The Technology of RadioDNS

- No **new** technology
- A **new** application for DNS (Domain Name Service)
- Uses **existing station identifiers** to make a “domain name”
- RadioDNS converts that to broadcaster’s **real domain**
- No **Patents, Licences** - it’s **Open Source**

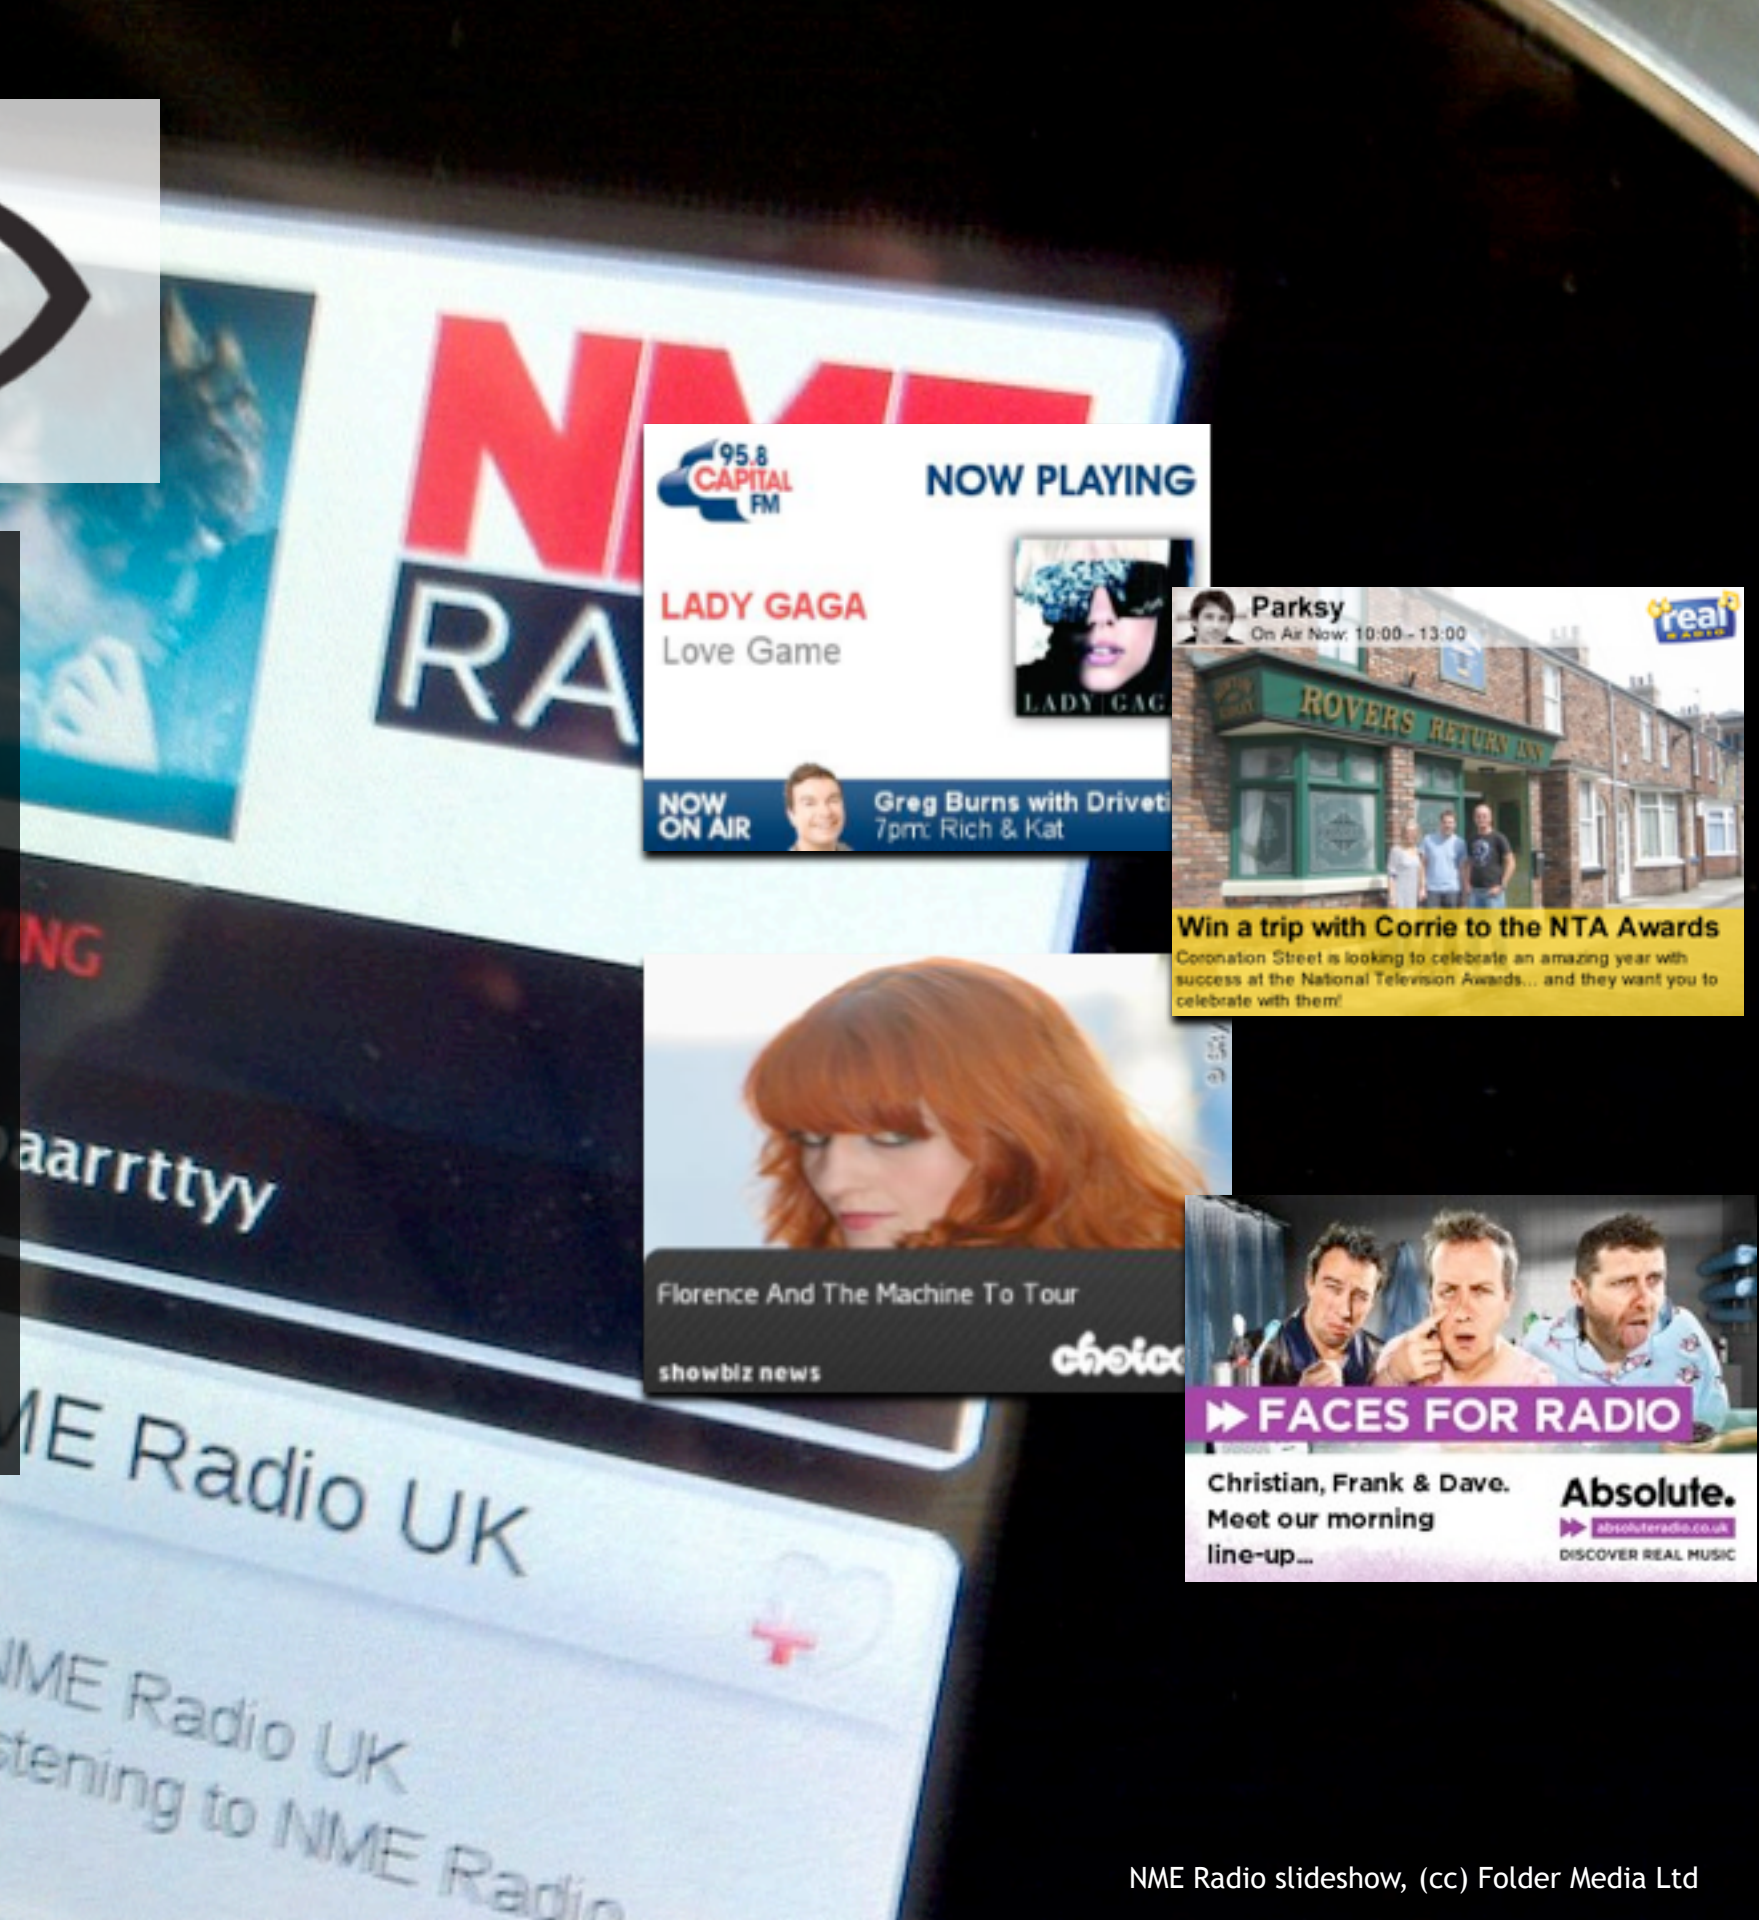

Open Standards for Hybrid Radio

- Simple “web-friendly” way of delivering visuals alongside radio.
- Click-throughs possible, to enable e-commerce and direct response
- Easy to do, looks great

RadioEPG

10/04/2011

10:00 Peter Cropley

13:00 Kerry Hanson

16:00 Stuart Fear

19:00 Nick P

- Electronic Program Guide: schedules for browsing or searching
- **Allows “service following” Automatic switch between stream & broadcast**
- The Single Station Preset

enhanced advertising

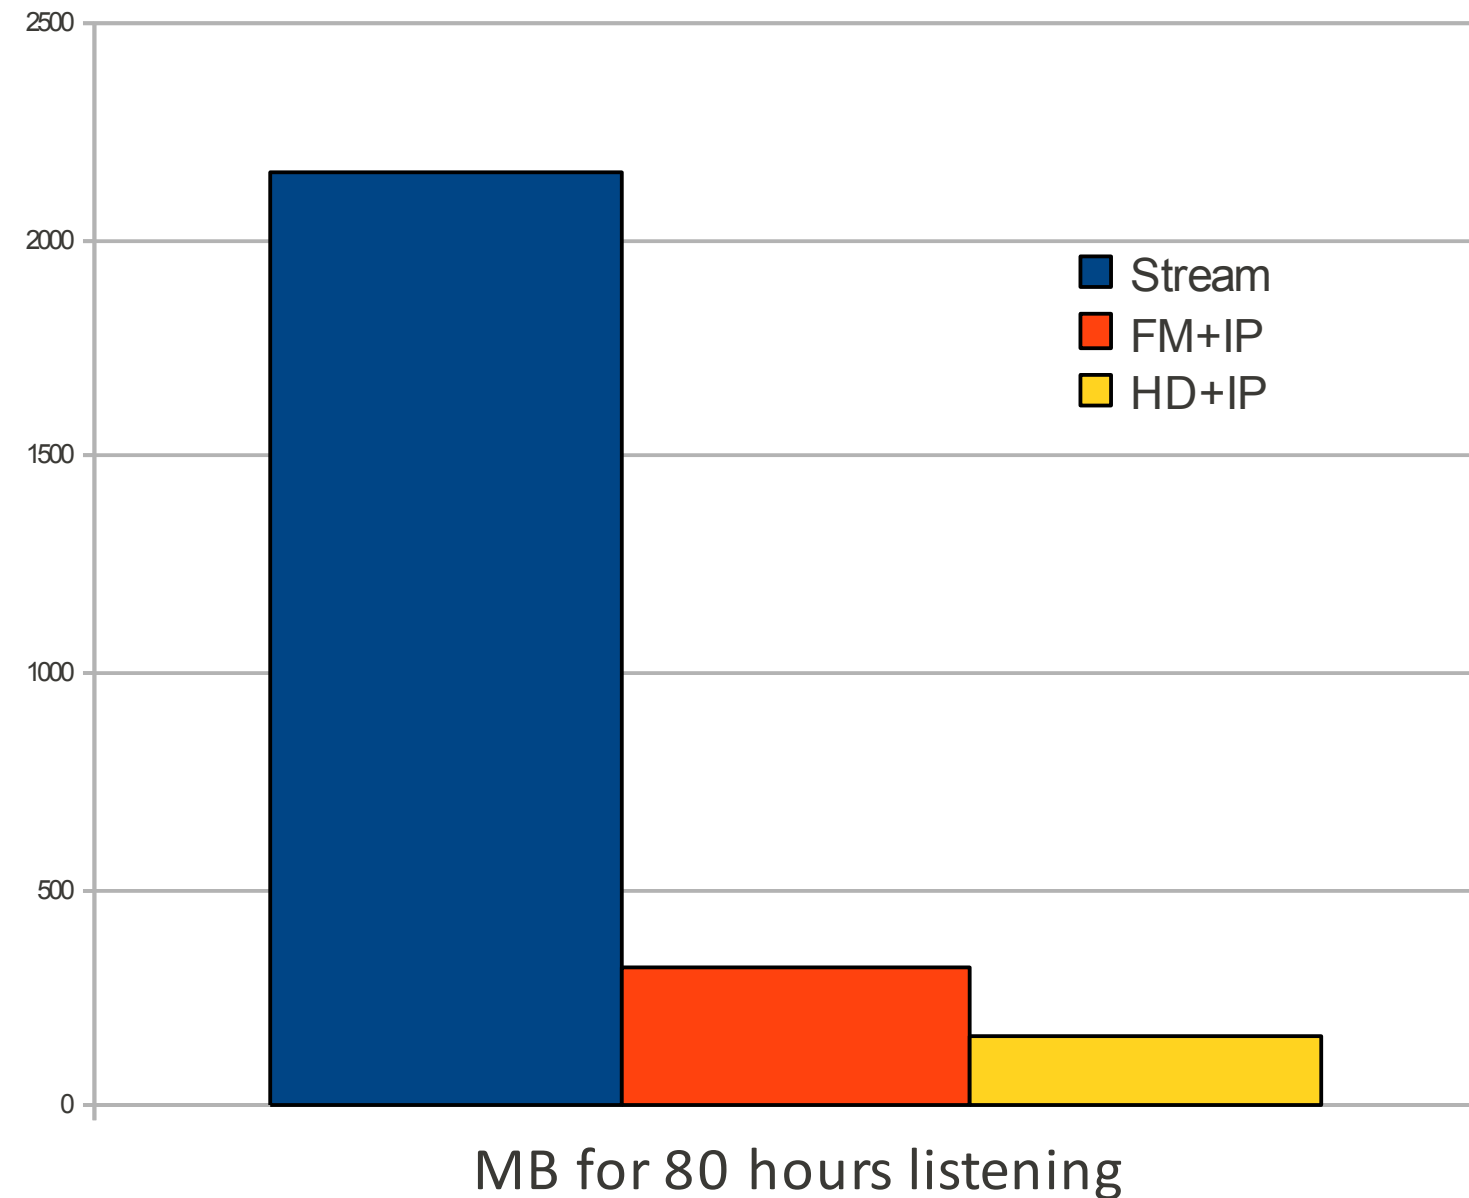

Streaming Apps

RadioDNS

- Use **FM or DAB+ Radio** – not Streaming
- Deliver **additional content** over IP
- Less buffering, **much less data consumption**
- Benefits **incumbent radio broadcasters**
- An **App-like Experience** for FM or DAB+ Radio

Hybrid Radio

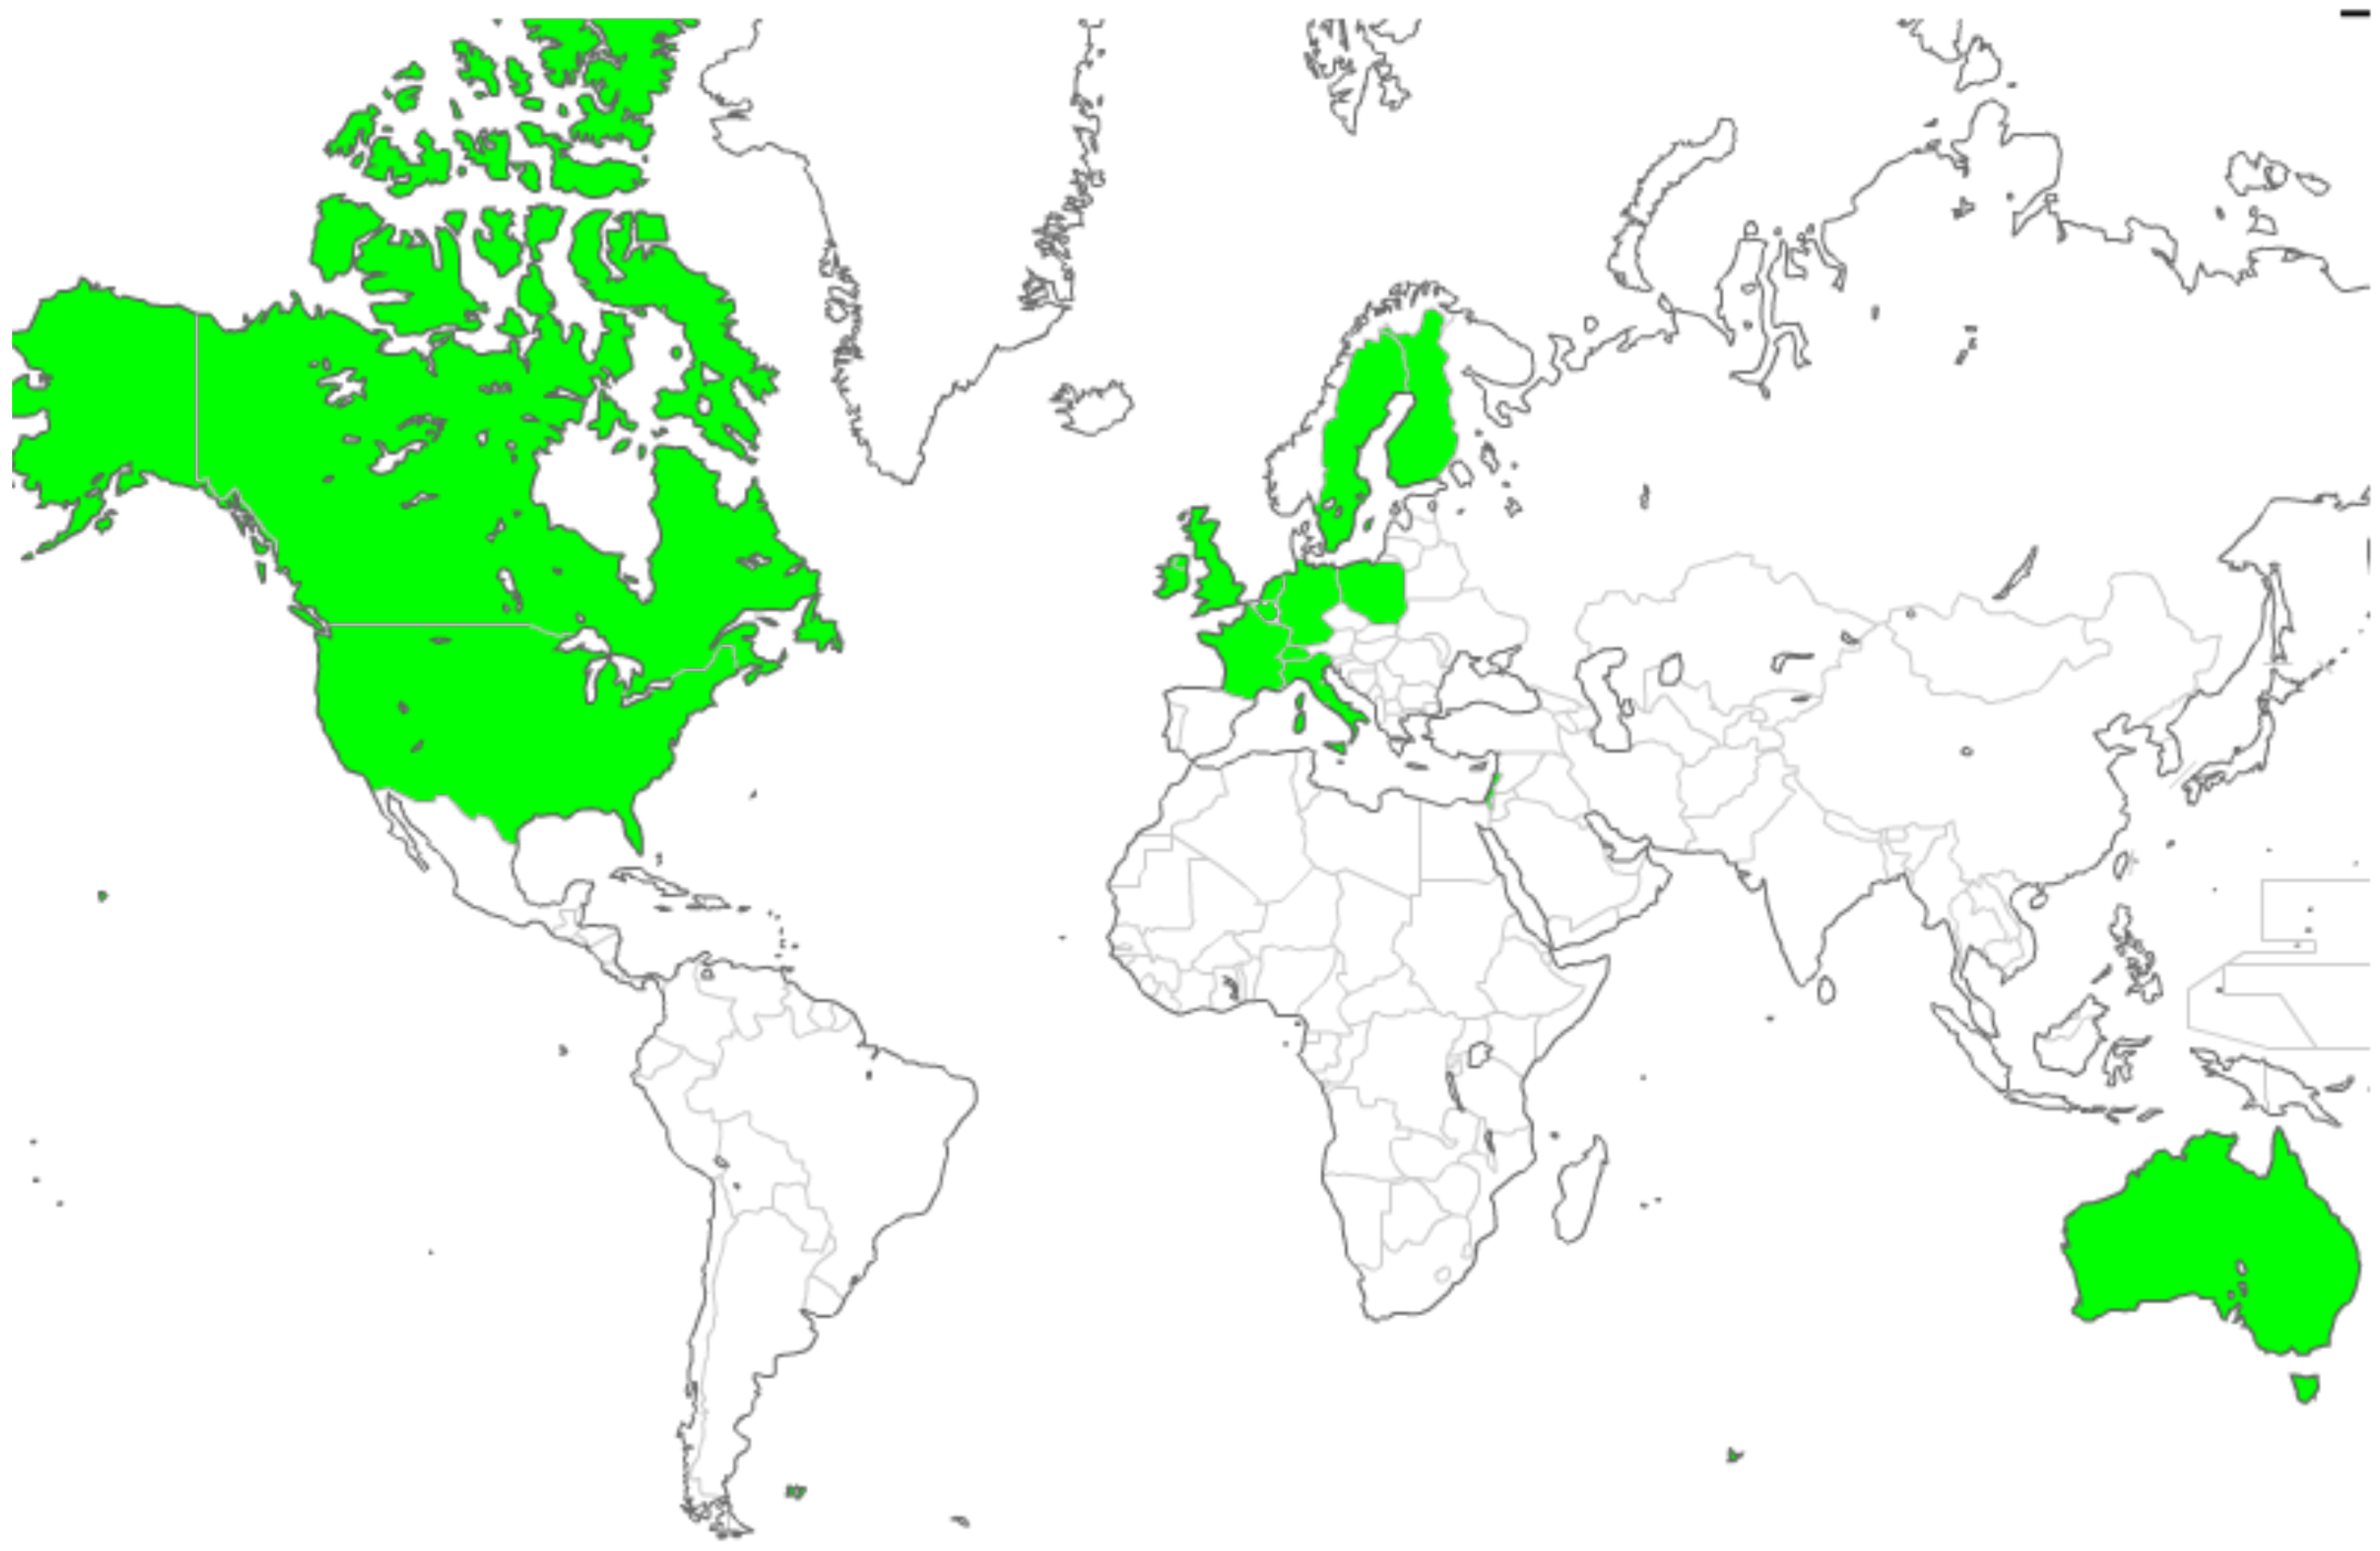

radio deserves more
s. Go beyond showing
images of them.
news. Use it to boost
